

Shower enclosure care instructions It's really this easy...

Basic manufacturer care recommendations to maximize the performance of your Diamon-Fusion® treated shower enclosure

For best results - Rinse or spray the surface with cool, clean water and wipe down the few remaining droplets. You may also towel dry the surface or use a squeegee.

Once a month - Wet the shower enclosure and use a nylon body puff to go over the surface until clean and smooth. Then rinse and wipe down any remaining droplets.

If you wish to use a cleaning product, the following may be used:

- White household vinegar diluted with water
- Sprayway® Ammonia-Free Glass Cleaner
- Seventh Generation™ Natural Glass & Surface Cleaner
- Simple Green®
- Ammonia-Free Windex®
