

WHAT IS THE BETTER CHOICE BETWEEN PLEXIGLASS OR FLAT GLASS FEATURING A 3R SMART ANTI-MICROBIAL COATING?

We know you have a choice right now, but do you know the difference between these two products?

Plexiglass

- 😞 Scratches Easily - Vision will be impaired
- 😞 Cleaning is time consuming and difficult
- 😞 Blowing the dust off will only spread the pathogens
- 😞 Porous surface can allow germs to live longer
- 😞 Will not last and degrades over time
- 😞 Unclear if there is a way to make it more hygienic

Glass with 3R Smart Anti-Microbial Coating Applied

- 😎 Long lasting, no change in looks or color
- 😎 EASY to clean and maintain
- 😎 Creates a more hygienic environment - Disinfectant!
- 😎 Addresses water buildup for less bacterial growth
- 😎 Smart Coating upgrades unprotected glass surfaces
- 😎 Long Term Safety and Health Peace of Mind!

The clear choice is GLASS with the SMART ANTI-MICROBIAL COATING. Choose that for the long term protection and health of your employees, customers, and business!
